

Art-Teas-Tree Café — Website Proposal & Costing

Prepared for: *Art-Teas-Tree Café, Bidhan Nagar, Kolkata (in association with the Mime Institute of Calcutta)*

Date: 14 June 2026 **Validity:** This quotation is valid for 30 days from the date above.

1. Overview

This document outlines the website built for Art-Teas-Tree Café — what it includes, how it works for you day to day, and a clear, one-time price with no hidden or recurring charges.

The website is a custom-designed digital home for the café: a cinematic, hand-crafted online presence inspired by Kolkata's tea-stall and theatre culture. It is **not** a template or a drag-and-drop builder — every section is designed and built specifically for your brand.

Crucially, the website is built so **you can keep it up to date yourself**, with nothing more than a Google Sheet. No coding, no logins to learn, no developer needed for everyday changes.

2. What the website includes

2.1 The core website

Feature	What it means for you
Custom cinematic design	A unique retro-Kolkata aesthetic (Satyajit Ray / Shantiniketan feel) — playbill hero, handwritten notes, paper textures, Bengali typography. Designed from scratch for your café.
Single-page café experience	Your story, philosophy/manifesto, a photo reel of the space, and a menu preview — all flowing together as one elegant page.
Fully responsive	Looks and works beautifully on mobile, tablet, and desktop. Most of your visitors are on phones — the site is optimised for them.
Live menu page	A full, filterable menu (by category) that you update yourself through a Google Sheet. Change a price, add an item, remove a dish — it reflects on the site automatically.
Fast & reliable	Built as a static site, so it loads quickly and stays online with virtually no downtime.
Search-engine friendly	Clean, well-structured pages so people can find the café online.
Owner's guide included	A simple, plain-English guide so anyone on your team can update content confidently.

2.2 The Events directory (*optional add-on*)

Feature	What it means for you
Events notice board	A dedicated page listing all upcoming performances, workshops, and exhibitions, with past events neatly archived.
Individual event pages	Each event gets its own beautifully laid-out page — tailored templates for Performances , Workshops , and Exhibitions .
Event photo galleries	A "camera roll" section per event with multiple photos and a click-to-zoom viewer.
Banners & posters	Each event can carry its own banner image.
Registration links	Link directly to a form or sign-up for each event.
Self-managed via Google Sheet	Add, edit, hide, or remove events yourself — no developer involved. The site updates automatically.

3. How you keep it updated

Everything that changes day to day — menu items, prices, events, photos — is controlled from **one Google Sheet** that we set up for you.

1. You edit the Sheet (just like typing into a table).
2. You save it.
3. The website updates itself automatically.

There is **no admin panel to log into and no technical skill required**. If you can use Google Sheets, you can run your website.

4. Pricing

The website is offered as **two packages**, depending on whether you want the Events directory. Both are **one-time costs**.

Package	What's included	Price (one-time)
Essential	The complete core website — custom design, home experience, live menu page, mobile-responsive, self-managed via Google Sheets, owner's guide.	₹10,000
Complete	Everything in Essential plus the full Events directory — event board, individual event pages, photo galleries, banners, and registration links.	₹15,000

All prices are in Indian Rupees (INR).

5. Why this cost

This is a **custom-built** website, not a template. Here is what the price reflects — and why it represents strong value:

- **Bespoke design & build.** Every section is individually designed and coded to match the café's identity. Comparable custom café websites from agencies in India typically range from **₹40,000 to ₹1,00,000+**, often with mandatory annual maintenance fees on top.
- **A self-serve content system.** The Google-Sheets-powered menu and events setup means you are never dependent on a developer (and never paying one) for routine updates. This alone saves recurring costs that most businesses pay indefinitely.
- **The Events directory is a substantial piece of work.** The ₹5,000

difference between the two packages covers genuinely more software: three distinct event page templates, photo galleries with a lightbox viewer, banner handling, registration links, an upcoming/past archive system, and the automatic Sheet-to-website pipeline behind it all.

- **One-time, honest pricing.** You pay once. You own the result. There is no subscription and no lock-in.

6. Payment terms

- **Advance:** A **30% advance** is required to begin work.
- Essential (₹10,000): **₹3,000 advance**, ₹7,000 on completion.
- Complete (₹15,000): **₹4,500 advance**, ₹10,500 on completion.
- **Balance:** The remaining amount is due on completion, before the final handover/launch.

7. What's not included

To keep pricing transparent, please note:

- **Domain name** (e.g. `artteastreecafe.com`) is **not included** in the above price. A domain is purchased separately, directly in the café's name, and typically costs around ₹800–₹1,500 per year (paid to the domain registrar, not to us). We will guide you through buying one and connect it to the site.

8. No recurring charges

There are **no recurring, monthly, or annual charges** from us for the website itself. Once it's built and handed over, it's yours.

The only ongoing cost that exists is the **domain renewal** (Section 7), which you pay directly to the domain provider — not to us.

9. In summary

	Essential	Complete
Custom café website	✓	✓
Live menu (self-managed)	✓	✓
Mobile responsive	✓	✓
Owner's guide	✓	✓
Events directory	—	✓
One-time price	₹10,000	₹15,000
Advance (30%)	₹3,000	₹4,500
Recurring charges	None	None
Domain included	No	No

We'd be glad to walk through any part of this in person. Thank you for considering us to build the café's digital home.
